SKILLS

- Full-stack Development
- REST API & JWT
- SQL & Database Design
- Embedded Systems
- OOP & Software Architecture
- Signal Processing / LabVIEW
- Multicultural Teamwork
- Machine Learning

TECHNOLOGIES

- Java, C / C++, C#
- Python, Pandas, Scikit-learn
- JavaScript, SQL, MATLAB
- Node.js, KiCad, CLion
- MS SQL Server, Azure
- MATLAB, Simulink, LabView

LANGUAGES

Dutch	Native
English	Fluent
German	Intermediate
Spanish	Lower Intermediate
Korean	Beginner

CERTIFICATIONS

Intro to Machine Learning
Kaggle, April 2026

Simulink Onramp
MathWorks, October 2024

PROFILE

International Computer Science student with experience across the Netherlands, Germany, South Korea, and Switzerland. Skilled in full-stack development, embedded systems, and database design. Currently completing a European Project Semester at OST in collaboration with Bühler.

EDUCATION

European Project Semester — Industrial Engineering

Feb 2026 – Present

OST – Eastern Switzerland University of Applied Sciences, St. Gallen

- Engineering project with Bühler: designing a low-cost mass flow measurement system working with embedded systems.
- Courses in Swiss Business Culture and Intercultural Mentoring.

Bachelor Applied Computer Science

Sep 2023 – Present

Saxion University of Applied Sciences, Enschede, Netherlands

- GPA 7/10 (Dutch scale). Focus: full-stack development, embedded systems, database design.
- Key projects: RESTful smartwatch API (Node.js / ESP32) and UTF-8 C++ text library.

Exchange Semester — Mechanical Engineering

Sep 2025 – Feb 2026

Hochschule Hannover, Germany

- 31 ECTS; GPA 2.05 ("Very Good"), incl. 7 ECTS Engineering Project graded 1.3 ("Excellent").
- Coursework: Production Planning and Control, Biomechanics, Intercultural Management.

Summer School — International Business & Korean Beginner 1

Summer 2025

Konkuk University, Seoul, South Korea

- GPA 3.75 / 4.5. Courses in International Business and Korean language (Beginner 1).

PROJECTS

Smartwatch / Embedded Systems *Feb – Aug 2025*

- Deployed RESTful Node.js API on Azure App Service for real-time ESP32 ↔ cloud sync with JWT authentication.
- JavaScript dashboard static web app on Azure for live health and motion data visualisation.
- Designed Azure SQL schema optimised for high-frequency time-series IoT sensor data.

UTF – C++ Text Library *Sep 2024 – Feb 2025*

- C++ UTF-8 library supporting multi-byte parsing, searching, insertion, deletion, and replacement.

PROFESSIONAL EXPERIENCE

IT Helper *Sep 2024 – Aug 2025*

Studentaanhuis, Netherlands

- Hardware and software diagnostics and repair for residential clients; regular maintenance scheduling.
